TO THE LEGISLATURE
OF THE
STATE OF NEW YORK.

The Governors of the Society of the New York
Hospital respectfully present their Annual
Report of the state of the Institutions under
their charge for the year 1902, as required by law.

ANNUAL REPORT

OF THE

Governors of the Society of the New York Hospital for the Year 1902.

In conformity with the provisions of its Charter, granted by George Third of England, June 13, 1771, the Governors of the Society of the New York Hospital present their Annual Report of the several Institutions under their control and management, located as follows:

The Hospital at Fifteenth and Sixteenth Streets, between Fifth and Sixth Avenues; the House of Relief, at 67 and 69 Hudson Street; and the Department for the treatment of mental diseases, known as Bloomingdale, located at White Plains, Westchester County.

63,686 patients received medical or surgical treatment in all departments for the year 1902, an increase of 606 patients over the previous year. The grand total treated since the commencement of Hospital work, January 3d, 1791, is 1,093,253.

The proportion of patients in the wards of the several Institutions receiving absolutely free treatment was sixty-two per cent., and a large proportion paid less than the actual cost of treatment.

As an illustration of the general growth of the work of the Society, it might be mentioned that in 1892, 38,118 were treated; and in 1902, 63,686.

The Treasurer's Report, showing the receipts and disbursements of the Society from all sources and on all accounts for the year 1902, is also presented.

At the Hospital in West Fifteenth and Sixteenth Streets, the total number of patients treated in all its departments was 17,682; this does not include 903 cases treated by the Ambulance Surgeons, but not admitted as patients.

In the General Wards of the Hospital and Private Patients Building 7,606 patients received medical or surgical care, divided in the proportion of 5,697 surgical to 1,909 medical. In the Private Patients Building 191 were treated in Private Rooms and 294 in Intermediate Wards, or a total of 485 patients. The total number of deaths was 394. The average daily census was 191, the largest daily number of patients was 219, the smallest 159. The

average number of days of treatment per patient was 10. The total days of Hospital treatment aggregated 69,867, of which number seventy-six per cent. were treated free.

In the Out Patient Department the number of patients examined and treated was 10,076; the total number of visits of these patients was 47,561, and the number of prescriptions compounded 32,626.

The House of Relief treated 42,571 patients during the year 1902; there were also treated by the Ambulance Surgeons 2,085 persons who were not admitted as patients.

2,883 patients received care and treatment in its wards, divided in the proportion of 349 patients in the General Wards to 2,534 in the Reception Wards. The total days of Hospital care aggregated 13,738.

In the Out Patient Department the total number of patients treated was 39,688; the number of visits of these patients aggregated 119,064, and the prescriptions compounded 45,512.

The service at the House of Relief was maintained at a cost to the Society of \$49,498.33 for the year 1902.

The number of ambulance calls at the Hospital for the year 1902 was 2,928, and at the House of Relief 4,276; the average daily number of ambulance calls at the Hospital being 8, and at the House of Relief 11.

Reference is made to the appended tables prepared under the direction of the Committee on Statistics of the Medical Board, giving results of treatment of both medical and surgical cases at the Hospital and House of Relief.

Attention is called to the report of the medical Superintendent of Bloomingdale, especially to that portion of it relating to the treatment of convalescent patients.

The total number of patients receiving care at Bloomingdale, White Plains, for the year 1902, as appears from the Annual Report of Dr. SAMUEL B. LYON, Medical Superintendent, to the Board of Governors, was 433; 201 men and 232 women, and the grand total treated since Bloomingdale was opened in 1821 is 10,322.

Of the total number of cases discharged during the year, viz.: 94; 24 patients recovered; 37 were improved; 12 did not improve, and 21 died. The proportion of patients at Bloomingdale receiving free treatment was 10.6 per cent., and 57.17 per cent. did not pay the entire cost of their support.

Miss IRENE H. SUTLIFFE has been obliged, owing to ill health, to retire from the position of Directress of the Training School. Miss SUTLIFFE was a graduate of our School, and was appointed to the position of Directress January 1st, 1886. During her incumbency of the office the duties and responsibilities very largely increased, but owing to her executive ability and her

patient courteous treatment of all, the department has gained in efficiency and has been conducted without any friction with other departments of the Hospital. Miss SUTLIFFE has endeared herself to everyone connected with the Hospital, and it is with regret that her illness has made it necessary for her to retire from the office.

Her successor, Miss ANNIE W. GOODRICH, who is also a graduate of our School, entered upon her duties June 1st, 1902, and has the full confidence of both the Governors and Medical Staff.

Miss FRANK M. SUTLIFFE, who has had charge of the Housekeeping Department for eighteen years, has also retired from the position. The onerous duties which attached to her office have been most successfully performed, and the best wishes of the Hospital go with her. Her place has been filled by Miss KATHERINE MACDIARMID, a former graduate of the Hospital.

It is gratifying that the work of the Hospital has been appreciated, as is evidenced by the gift of \$10,000 for the endowment of two beds in perpetuity by Mrs. MARGARET J. PLANT, in memory of her brother, SIMON LOUGHRAN. The beneficiaries of this gift it is provided shall be the members of the Uniformed Force of the New York Fire Department who may be injured or ill while in the active service of the department. Also a gift of \$10,000. \$5,000 each, from Miss CATHARINE B., and her sister, Miss MARIA L. CAMPBELL, a contribution toward the expense of increasing the capacity of the Nurses' Home.

CORNELIUS N. BLISS,
President.

HENRY W. CRANE,
Secretary.

NEW YORK, February 3d, 1903.

" " " Women, in November.....	..	166	..
" total was, in January.....	319
The highest number was: Men, in December.....	157
" " " Women, in July.....	..	186	..
" total was, in July.....	337

ADMISSIONS.

There were 95 patients, 49 men and 46 women, admitted during the year. Fourteen patients, 9 men and 5 women, had been discharged from the Institution prior to January 1, 1902; 2 men three times, 1 man twice and 6 men once, 1 woman twice and 4 women once. Of those re-admitted for the first time, 3 men and 1 woman had been discharged as recovered, and 3 men and 3 women as improved. One man had been once discharged as recovered and once as improved, and 1 woman twice as recovered and once as improved.

Seventy-nine of the admissions, 42 men and 37 women, were first attacks, 57 of which, 30 men and 27 women, were admitted first to Bloomingdale. Deducting from the whole number of admissions 10 cases that had been admitted in previous years, and 57 admissions in first attacks, leaves 28 cases that have been either treated at home or at some other Institution previous to admission here.

Thirty-one patients were admitted 3 months or less after the first symptoms of mental disease were noticed by their friends, 12 between 3 and 6 months, 16 between 6 and 12 months, and 36 more than a year.

There was 1 man who was discharged and re-admitted in the course of the year.

DISCHARGES.

The total number of discharges during the year was 94, 42 men and 52 women. The number of recoveries was 24, 12 men and 12 women. They were 25 per cent. of all discharges, including deaths, 28 per cent. of the men who were discharged or died, and 23 per cent. of the women who were discharged or died.

Fourteen patients, 6 men and 8 women, recovered from the first attack, 5 patients, 3 men and 2 women, from the second, 1 man and 2 women from the third, 1 man from the ninth, and 1 man from the tenth attack.

In the 24 cases that recovered, the average duration of the disease from invasion to recovery was 9 months and 19 days; of the men, 11 months and 10 days, and of the women, 7 months and 28 days. The average duration of treatment was 5 months and 11 days; of the men, 5 months and 7 days, and of the women, 5 months and 16 days. The longest period of treatment was

11 months and 8 days, in the case of 1 man, and 17 months and 21 days in the case of 1 woman; the shortest was 1 month and 29 days of 1 man, and 1 month and 12 days of 1 woman.

The disease was reported to have existed before admission an average of 4 months and 3 days; in the men, 6 months and 3 days, and in the women, 2 months and 13 days.

Twelve patients, 9 men and 3 women, recovered from mania, and 12, 3 men and 9 women, from melancholia.

Two alcohol habitues, both men, were discharged as recovered.

Of the 37 cases, 14 men and 23 women, who were discharged as improved, 2 men and 10 women seemed likely, at the time of their discharge, to recover if continued under treatment.

Of the 12 patients, 4 men and 8 women, who were discharged unimproved, none seemed likely to recover if continued under treatment.

		Total	21

DEATHS.

Twenty-one patients, 12 men and 9 women, died during the year, this being 6 less than the number reported last year.

Among these 21 deaths, there were only 2 acute cases, both women, and neither of these were favorable for recovery; one had chronic nephritis and chronic splenitis, and the other was so much exhausted, combined with hystero-epilepsy, that she lived less than three days after admission.

Among the remaining 19 cases the mental disease had existed for periods ranging from 2 to more than 22 years.

One of these cases had been under treatment for 12 years, 1 for 9 years and 3 months, 1 for 8 years and 11 months, and the remainder for shorter periods.

The average time they spent in the Institution was 3 years, 1 month and 19 days.

In the 7 cases of general paresis, the longest period of their hospital treatment was 7 years, 2 months and 7 days. The next longest, 5 years, 7 months and 17 days; 1 for 3 years, 2 months and 14 days, and the remaining cases for shorter periods.

The average time they were under treatment here was 2 years, 11 months and 16 days.

The longest time from marked manifestation of disease prior to admission was said to have been 3 years; the shortest was 5 months; the average was 1 year, 1 month and 2 days. The longest period from first manifestation to death was 8 years, 2 months and 7 days; the shortest was 10 months and 22 days.

The average duration of the disease from the first manifestation to death was said to have been 4 years and 18 days.

The total number of deaths was at the rate of 4.69 per cent. of all the cases treated; in the men 5.97 per cent. and in the women 4 per cent.

GENERAL REMARKS.

There were 4 more admissions this year than last.

The average number of patients in the Institution was 329, 1 more than the average of the preceding year.

The number of weeks board and treatment furnished for patients was 17,127 $\frac{1}{4}$, a decrease since last year of 129 $\frac{1}{4}$. The average expenditure per patient was \$12.28 per week, an increase over cost of 1901 of 94 cents, not including the reimbursement to the Institution by the friends of patients of the wages paid for private attendants.

The total expenditures for the year were not materially increased over those of former years, notwithstanding the well recognized increased cost of almost all supplies necessary to the support of the Hospital.

Sixty-one women were beneficiaries of the John C. Green Memorial Fund during the year 1902. The amount of income received from that fund and expended for these women in 1902 was \$6,956.14, a decrease from the income

of that fund below the year 1901 of \$478.02. The total charitable expenditures during 1902 in caring for and treating patients (preferably acute and presumably hopeful cases) was \$58,177.38. Two hundred and thirty-five individuals shared in this charitable assistance, some being entirely and others partially supported. The sum of \$51,221.24 was expended for this purpose from the earnings of Bloomingdale during the year 1902; 10.6 per cent. of the patients treated contributed nothing whatever to their support; 55.17 per cent. of the patients paid sums varying from nothing to the bare cost of their care. Only 42.83 per cent. paid a rate which secured a profit to the Institution, which receives no public, State or City aid, is self-supporting, and devotes all excess of its receipts over its expenditures to the improvement of the Institution and the support of its beneficiaries. The total support and the partial assistance rendered to patients unable to pay for their entire cost to the Hospital was equivalent to maintaining 90 free beds.

There have been no changes in the staff during the year, excepting that made by the ending of the term of Dr. William B. Mason, on July 31, 1902, who was succeeded on August 1, 1902, by Dr. Wm. H. Palmer, and all the officers have discharged their duties faithfully and intelligently, with an evidence of real interest in their work.

It is again a pleasure to record the excellent service rendered by all those employed by the Institution.

TRAINING SCHOOL.

During the past year 9 men and 2 women received certificates of having pursued the studies laid down in the Training School for Attendants, having attained a reasonable degree of efficiency. This was the fifth regular examination, and the graduates of the school of instruction for attendants now number a total of 59, of which remain in the employ of the Institution 11 men and 16 women, total 27.

THE CONVALESCENT HOMES FOR PATIENTS FROM THE NEW YORK HOSPITAL.

The Convalescent Homes for patients from the New York Hospital accommodated during the year 64 men and 54 women patients, and 2,148 days board were furnished them, which is 20 more men and 6 more women than enjoyed the benefits of the home the preceding year. A number of deserving patients from other hospitals in New York City were allowed to share this privilege, their admission being regulated by the Superintendent of the New York Hospital. The benefits of these homes in completing the convalescence and cure

of patients recovering from acute attacks of disease, or surgical operations, and the amelioration of the sufferings in cases of chronic diseases were very marked and fully justified the care and expense of the establishment, and this year the men were much more comfortably and conveniently cared for in the very good and commodious residence of the late owner of the property, acquired to the east of the original grounds in 1901. This somewhat remodelled, and fitted with new and suitable plumbing makes an admirable place for its use as a convalescent home for men.

IMPROVEMENTS.

An additional and very fine well 20 feet inside diameter and about 26 feet deep, which has averaged a depth of water of 18 feet since we began to use it, has put our water supply on a very satisfactory basis.

The north end of the farm, to the east of the original property, which was acquired last year, has been incorporated in the ornamental grounds, with a new entrance at the northeast corner, and an appropriate road, shrubbery, etc.

SAMUEL B. LYON,
Medical Superintendent.

THE SOCIETY OF THE NEW YORK HOSPITAL,
BLOOMINGDALE, WHITE PLAINS.

GOVERNORS

OF

The Society of the New York Hospital.

The following is a list of the names of Governors from the commencement of the institution to the first of January, 1903, with the date of their respective elections, and the length of time they continued in office :

GOVERNORS.	Elect- ed.	Re- signed.	Served the Institution.	
A.				
Charles Ward Apthorp	1770	1784	14 years	Died in office, 1819.
William Axtell	1770	1784	14 years	
John Alsop	1784	1788	4 years	
Gilbert Aspinwall	1799	1809	} 15 years	
Gilbert Aspinwall	1811	1812		
Gilbert Aspinwall	1815			
John Atkinson	1800	1809	9 years	Died in office, 1852.
John Aspinwall	1814	1817	3 years	
John Adams	1818	1854	36 years	
Stephen Allen	1823	1830	} 24 years	
Stephen Allen	1835			
Augustin Averill	1848	1857	9 years	Died in office, 1879.
John Jacob Astor	1860	1864	4 years	
George W. Abbe	1877		2 years	
William W. Astor	1879	1882	3 years	
B.				
Gerardus William Beekman	1770	1777	7 years	Died in office, 1818.
George Bowne	1770	1784	} 26 years	
George Bowne	1785	1797		
William Bayard	1777	1784	} 9 years	
William Bayard	1800	1802		
Robert Bowne	1784		34 years	
Aaron Burr	1784	1792	8 years	
James Beekman	1785	1787	2 years	
Theophylact Bache	1785	1797	12 years	
Thomas Buchanan	1785	1800	15 years	
Francis Basset	1785	1787	2 years	
William Backhouse	1787	1792	5 years	
Nicholas Bayard	1794	1798	4 years	
John Barrow	1795	1807	12 years	
Samuel Bowne	1796	1797	1 year	
Walter Bowne	1800	1805	5 years	
Dr. Samuel Bard	1801	1802	1 year	
Rev. Abraham Beach	1801	1806	5 years	
Thomas Buckley	1802	1842	40 years	
John Bogert	1804	1817	13 years	
John L. Bowne	1810	1815	5 years	
Abraham Barker	1813	1816	3 years	
Robert H. Bowne	1815	1827	12 years	
William Bayard, Jr.	1818	1823	5 years	
John L. Buckley	1842	1855	13 years	

GOVERNORS.	Elect- ed.	Re- signed.	Served the Institution.		
James W. Beekman-----	1850	1854	} 23 years	Died in office, 1877.

TO THE LEGISLATURE
OF THE
STATE OF NEW YORK.

The Governors of the Society of the New York Hospital respectfully present their Annual Report of the state of the Institutions under their charge for the year 1903, as required by law.

ANNUAL REPORT

OF THE

Governors of the Society of the New York Hospital for the Year 1903.

In conformity with the provisions of its Charter, granted by George Third of England, June 13, 1771, the Governors of the Society of the New York Hospital present their Annual Report of the several Institutions under their control and management, located as follows:

The Hospital at Fifteenth and Sixteenth Streets, between Fifth and Sixth Avenues; the House of Relief, at 67 and 69 Hudson Street; and the department for the treatment of mental diseases, known as Bloomingdale, located at White Plains, Westchester County.

50,472 patients received medical or surgical treatment in all departments for the year 1903. The grand total treated since the commencement of Hospital work, January 3, 1791, is 1,143,725.

The proportion of patients in the wards of the several Institutions receiving absolutely free treatment was 52 per cent., and a larger proportion paid less than the actual cost of treatment.

The Treasurer's Report, showing the receipts and disbursements of the Society from all sources and on all accounts for the year 1903, is also presented. A comparison of this year's financial statement with that of 1902 shows a material reduction in the current expenses of the three Institutions of the Society, although there has not been any diminution in the effectiveness of the work.

At the Hospital in West Fifteenth and Sixteenth Streets, the total number of patients treated in all its departments was 14,032; this does not include 973 cases treated by the Ambulance Surgeons, but not admitted as patients.

In the General Wards of the Hospital and Private Patients Building 7,449 patients received medical or surgical care, divided in the

proportion of 5,470 surgical to 1,979 medical. In the Private Patients Building 180 were treated in the Private Rooms and 253 in Intermediate Wards, or a total of 433 patients. The total number of deaths was 430. The average daily census was 189; the largest daily number of patients was 226, the smallest 138. The average number of days of treatment per patient was 9. The total days of Hospital treatment aggregated 69,213, of which number fifty-six per cent. were treated free.

In the Out Patient Department, the number of patients examined and treated was 7,483; the total number of visits of these patients was 41,324, and the number of prescriptions compounded 23,072.

The House of Relief treated 35,084 patients during the year 1903; there were also treated by the Ambulance Surgeons 2,440 persons who were not admitted as patients.

2,581 patients received care and treatment in its wards, divided in the proportion of 372 patients in the General Wards to 2,208 in the Reception Wards. The total days of Hospital care aggregated 12,898.

In the Out Patient Department the total number of patients treated was 32,503; the number of visits of these patients aggregated 82,946, and the prescriptions compounded 37,266.

The number of ambulance calls at the Hospital for the year 1903 was 2,976, and at the House of Relief 4,478; the average daily number of ambulance calls at the Hospital being 8, and at the House of Relief 12.

Reference is made to the appended tables, prepared under the direction of the Committee on Statistics of the Medical Board, giving results of treatment of both medical and surgical cases at the Hospital and House of Relief.

The total number of patients receiving care at Bloomingdale, White Plains, for the year 1903, as appears from the Annual Report of Dr. SAMUEL B. LYON, Medical Superintendent, to the Board of Governors, was 456; 220 men and 236 women, and the grand total treated since Bloomingdale was opened in 1821 is 10,446.

Of the total number of cases discharged during the year, viz.: 101; 31 patients recovered; 35 were improved; 18 did not improve, and

27 died. The proportion of patients at Bloomingdale receiving free treatment was nearly 8 per cent., and 57 per cent. did not pay the entire cost of their support.

The Convalescent Home at White Plains has been open as usual during the spring, summer and autumn months. For statistical information in regard to the same, reference is made to the Report of the Medical Superintendent of Bloomingdale.

A gift of \$5,000 from NATHANIEL WHITMAN for the endowment of a free bed in perpetuity has been received and the gift is duly appreciated by the Board. What can be more satisfactory than a gift for the perpetual relief of the sick poor?

A legacy of \$25,000 from the late James H. Banker has been left to the Hospital with which to erect a Memorial Cottage at Bloomingdale. When the amount of the legacy is received, the matter of erecting the cottage will be considered.

During the past year, Mr. GEORGE S. BOWDOIN and Mr. THOMAS H. BARBER resigned as Governors of the Board.

PHILIP SCHUYLER,
President.

HENRY W. CRANE,
Secretary.

NEW YORK, February 3d, 1904.

TREASURER'S REPORT.

The receipts and payments of the Society of

“ total was, in April.....	343

ADMISSIONS.

There were 124 patients, 61 men and 63 women, admitted during the year. Twenty-four patients, 13 men and 9 women, had been discharged from the Institution prior to January 1, 1903; 1 man four times, 3 men twice and 11 men once; 1 woman four times, 3 women three times, 1 woman twice and 5 women once. Of those readmitted for the first time, 3 men and 2 women had been discharged as recovered and 8 men and 3 women as improved. Three men and 1 woman had each been twice discharged as recovered. Two women had been discharged twice as recovered and once as improved, and 1 man and 1 woman had each been discharged four times as improved.

One hundred and three of the admissions, 51 men and 52 women, were first attacks, 55 of which, 30 men and 25 women, were admitted first to Bloomingdale. Deducting from the whole number of admissions 17 cases that had been admitted in previous years, and 55 admissions in first attacks, leave 52 cases that have been either treated at home or at some other institution previous to admission here.

Thirty-five patients were admitted three months or less after the first symptoms of mental disease were noticed by their friends, 13 between 3 and 6 months, 16 between 6 and 12 months, and 60 more than a year.

There were 2 men and 1 woman who were discharged and readmitted in the course of the year.

TABLE No. 2.
TABLE SHOWING ADMISSIONS DURING THE YEAR 1903.

DISCHARGES.

The total number of discharges during the year was 111, 61 men and 50 women. The number of recoveries was 31, 16 men and 15 women. They were 28 per cent. of all discharges, including deaths, 26 per cent. of the men who were discharged or died and 30 per cent. of the women who were discharged or died.

Eighteen patients, 10 men and 8 women, recovered from the first attack, 8 patients, 2 men and 6 women, from the second, 3 men from the third, 1 man from the fourth and 1 woman from the sixth attack.

In the 31 cases that recovered the average duration of the disease from invasion to recovery was 9 months and 16 days; of the men 11 months and 13 days, and of the women 7 months and 12 days. The average duration of treatment was 6 months and 4 days; of the men, 6 months and 21 days, and of the women, 5 months and 17 days. The longest period of treatment was 25 months and 7 days in the case of 1 man, and 15 months and 14 days in the case of 1 woman; the shortest was 1 month and 5 days of 1 man, and 1 month and 12 days of a woman.

The disease was reported to have existed before admission an average of 3 months and 12 days; in the men, 4 months and 23 days, and in the women, 1 month and 4 days.

Nineteen patients, 11 men and 8 women, recovered from mania, and 12, 5 men and 7 women, from melancholia.

Four alcohol habitues, 3 men and 1 woman, were discharged as recovered.

Of the 36 cases, 21 men and 15 women, who were discharged as improved, 1 man and 4 women seemed likely, at the time of their discharge, to recover if continued under treatment.

Of the 17 patients, 7 men and 10 women, who were discharged unimproved, none seemed likely to recover if continued under treatment.

		Total.....	27

DEATHS.

Twenty-seven patients, 17 men and 10 women, died during the year, this being 6 more than the number reported last year.

Among these 27 deaths there were only 2 acute cases, both men, and neither of these were favorable for recovery; one had acute nephritis and the other was so much debilitated that he quickly succumbed to an attack of pneumonia.

Among the remaining 25 cases the mental disease had existed for periods ranging from 1 to more than 53 years.

One of these cases had been under treatment for 53 years, 1 for 40 years and 9 months, 1 for 33 years, 1 for 20 years and 6 months, 1 for 16 years and 7 months, and the remainder for shorter periods.

The average time they spent in the Institution was 7 years and 6 days. In the 11 cases of general paresis, the longest period of their hospital treatment was 5 years, 4 months and 27 days. The next longest was for 2 years, 7 months and 25 days; 1 for 2 years, 7 months and 11 days, and the remaining cases for shorter periods.

The average time they were under treatment here was 1 year, 9 months and 21 days. This is about 1 year and 2 months less than the average time this class of patients were under treatment last year.

The longest time for marked manifestation of disease prior to admission was said to have been 3 years; the shortest was 6 months; the average was 1 year, 5 months and 22 days. The longest period from first manifestation to death was 4 years, 7 months and 12 days; the shortest was 9 months and 10 days.

The average duration of the disease from the first manifestation to death was said to have been 3 years, 3 months and 18 days.

The total number of deaths was at the rate of 5.70 per cent. of all the cases treated; in the men 7.72 per cent. and in the women 4.23 per cent.

GENERAL REMARKS.

There were 29 more admissions this year than last.

The average number of patients in the Institution was 336, 7 more than the average of the preceding year.

The number of weeks board and treatment furnished for patients was 17,525, an increase since last year of 397 3-7 weeks. The average expenditure per patient was \$12.21 per week, which includes the total cost of maintaining the property at White Plains and the patients upon it, both insane and at the Convalescent Homes, for all salaries and wages, repairs, supplies and maintenance of every kind. This was a decrease of 7 cents per capita of the cost of the preceding year.

The total expenditures for the year were not materially increased over those of the preceding year, notwithstanding that articles of current consumption of almost every kind cost more, and the unusually cool and wet summer caused a material reduction in the products of our farm and garden, and although we supported an average of 10 more insane patients and 33 more convalescent patients from the New York hospitals.

Sixty women were beneficiaries of the John C. Green Memorial Fund during the year 1903. The amount of income received from that fund and expended for these women in 1903 was \$6,842.51, a decrease

from the income of that fund below the year 1902 of \$113.63. The total charitable expenditure during the year 1903 in caring for and treating patients (preferably acute and presumably hopeful cases) was \$54,830.02. Two hundred and fifty-nine individuals shared in this charitable assistance, some being entirely and others partially supported. The sum of \$47,987.51 was expended for this purpose from the earnings of Bloomingdale during the year 1903, from which sum the charitable assistance to patients, both insane and convalescents from New York Hospital, was given to the extent mentioned above, all profits from remunerative patients being expended in maintaining the Institution and supporting patients not able to pay remunerative prices. Eight per cent. of the patients treated contributed nothing whatever to their support; 57 per cent. of the patients paid sums varying from nothing to the bare cost of their care. Only 43 per cent. paid a rate which secured a profit for the institution. The total support and partial assistance rendered to patients unable to pay for their entire cost to the Hospital was equivalent to maintaining 86 free beds.

There have been no changes in the staff during the year, excepting that made by the ending of the term of Dr. F. M. Cunningham on April 1, 1903, as Clinical Assistant Physician, who was succeeded on April 1, 1903, by Dr. Lemuel S. Allen, Dr. Allen being succeeded by Dr. M. L. Rea on November 1, 1903, who remained until December 10, 1903. I am glad to be able again to state that all the officers and employees, with a few exceptions, have discharged their duties faithfully and intelligently and with evidence of real interest in their work.

TRAINING SCHOOL.

The Institution was visited on the 16th day of May by the President, Vice-President, Treasurer, Governors of the Society and members of the Bloomingdale Committee, who made an inspection of the buildings and grounds and found the appearance and condition good, on which occasion they attended the exercises in which the graduates of the Bloomingdale Training School for Attendants were given their certificates and medals. The graduates, including the six who graduated this year, amount to a total of 68 since the school was first started in 1895, of which there remain in the employ of the Institution 12 men and 25 women.

OUTINGS.

Besides the regular outings, the summer excursions to the Oakland Bathing Beach at Rye, where the Hospital has hired a small pavilion, were maintained throughout the summer, whenever the weather was suitable; a number of excursions also were made by men

patients and their attendants on the trolley cars to Mamaroneck, and thence on the Sound in a naphtha launch. As these excursions were a variation of the ordinary routine, they seemed to be greatly enjoyed by those who participated in them.

All the regular amusements and outdoor exercises, such as tennis, baseball, golf, etc., were maintained with interest throughout the season.

CONVALESCENT HOMES.

In the Convalescent Homes for patients from the New York Hospital there were treated during the year 77 men and 74 women, to whom were furnished 2,262 days' board at an estimated cost of one dollar per day. This number of patients is 33 in excess of the number treated the preceding year.

Respectfully submitted,

SAMUEL B. LYON, M. D.

Medical Superintendent.

THE SOCIETY OF THE NEW YORK HOSPITAL,
BLOOMINGDALE, WHITE PLAINS.

GOVERNORS

OF

The Society of the New York Hospital.

The following is a list of the names of Governors from the commencement of the institution to the first of January, 1904, with the date of their respective elections and the length of time they continued in office :

GOVERNORS.	Elect- ed.	Re- signed.	Served the Institution.	
A.				
Charles Ward Apthorp.....	1770	1784	14 years	
William Axtell.....	1770	1784	14 years	
John Alsop.....	1784	1788	4 years	
Gilbert Aspinwall.....	1799	1809	} 15 years	Died in office, 1819.
Gilbert Aspinwall.....	1811	1812		
Gilbert Aspinwall.....	1815			
John Atkinson.....	1800	1809	9 years	
John Aspinwall.....	1814	1817	3 years	
John Adams.....	1818	1854	36 years	
Stephen Allen.....	1823	1830	} 24 years	Died in office, 1852.
Stephen Allen.....	1835			
Augustin Averill.....	1848	1857	9 years	
John Jacob Astor.....	1860	1864	4 years	
George W. Abbe.....	1877		2 years	Died in office, 1879.
William W. Astor.....	1879	1882	3 years

TO THE LEGISLATURE
OF THE
STATE OF NEW YORK.

The Governors of the Society of the New York Hospital respectfully present their Annual Report of the state of the Institutions under their charge for the year 1904, as required by law.

ANNUAL REPORT

OF THE

Governors of the Society of the New York Hospital for the Year 1904.

In conformity with the provisions of its Charter, granted by George Third of England, June 13, 1771, the Governors of the Society of the New York Hospital present their Annual Report of the several institutions under their control and management, located as follows:

The Hospital at Fifteenth and Sixteenth Streets, between Fifth and Sixth Avenues; the House of Relief at 67 and 69 Hudson Street; and Bloomingdale, located at White Plains, Westchester County.

51,526 patients received medical or surgical treatment in its several Institutions for the year 1904. The grand total, including the year 1904, treated since the commencement of Hospital work, January 3rd, 1791, is 1,195,251.

The proportion of patients in the wards of the several Institutions receiving free treatment was 53 per cent.

The Treasurer's Report, showing the receipts and disbursements of the Society from all sources and on all accounts for the year 1904, is also presented.

MAIN HOSPITAL.

At the Hospital in West Fifteenth and Sixteenth Streets the number of patients treated in all its departments was 16,274; this does not include 1,081 cases treated by Ambulance Surgeons, but not admitted as patients.

In the General Wards and Private Patients Building 7,332 patients received medical or surgical care, divided in proportion of 5,473 surgical to 1,859 medical. Of these 184 were treated in Private Rooms and 148 in Intermediate Wards of the Private Patients Building, or a total of 332 patients. The number of deaths was 459. The average daily

census was 188; the largest daily number of patients was 231, the smallest 158. The average number of days of treatment per patient was 9. The days of Hospital treatment aggregated 69,130. In the Wards of the Main Hospital, the percentage of free patients was 68.

In the Out Patient Department, the number of patients was 8,610; the number of visits of these patients was 42,299, and the number of prescriptions compounded 28,233.

The number of ambulance calls for the year was 3,166; the average daily number was 9.

HOUSE OF RELIEF.

34,780 patients were treated during the year; there were also treated by the Ambulance Surgeons 2,337 persons who were not admitted as patients.

3,266 patients received treatment in its wards, divided in the proportion of 354 patients in the General Wards to 2,912 in the Emergency Wards. The days of Hospital care aggregated 15,462.

In the Out Patient Department the number of patients treated was 31,514; the number of visits of these patients aggregated 78,022, and the number of prescriptions compounded was 39,612.

The number of ambulance calls for the year was 5,084; the average daily number was 14.

Reference is made to the appended tables, prepared under the direction of the Committee on Statistics of the Medical Board, giving results of treatment of both medical and surgical cases at the Hospital and House of Relief.

BLOOMINGDALE.

The number of patients receiving care for the year, as appears from the Annual Report to the Board of Governors of Dr. SAMUEL B. LYON, Medical Superintendent, was 472; 237 men and 255 women, and the grand total treated since Bloomingdale was opened in 1821 is 10,573.

Of the number of cases discharged during the year, viz: 132; 34 patients recovered; 60 were improved; 10 did not improve, and 28 died. The proportion of patients at Bloomingdale receiving free treatment

was nearly 9 per cent., and 53 per cent. did not pay the entire cost of their support.

It is most gratifying to acknowledge the following gifts:

Legacy from Estate George W. Jewett..... \$5,000 00

For Free Beds in Perpetuity:

Howard Willets, in memory of his son, Jack Willets.... 5,000 00

Mrs. Harriette M. Arnold, in memory of Hicks Arnold. 5,000 00

Donations:

Bishop of Ripon, England, in grateful appreciation of
the kindness and care to his wife while a patient in
Hospital, "thirty guineas"..... 153 09

American Bank Note Co., specially designated, through
Hospital Saturday and Sunday Association..... 100 00

Mrs. Kate Thomas, Almira, State of Washington..... 5 00

Miss Anna Taggart, in behalf of her brother, George
Taggart 4 00

Miss A. A. Hofmayer..... 15 00

Sir Charles Wyndham 3 00

"A Friend" 50

During the past year Mr. John Claflin resigned as a Governor, and there being three vacancies in the Board, Messrs. James W. Alexander, Charles S. Brown and George L. Rives were elected Governors of the Hospital.

PHILIP SCHUYLER,

President.

HENRY W. CRANE,

Secretary.

“ total was, in September.....	352

ADMISSIONS.

There were 127 patients, 78 men and 49 women, admitted during the year. Twenty patients, 13 men and 7 women, had been discharged from the Institution prior to January 1, 1904; 1 man seven times, 3 men four times, 1 man twice, and 8 men once, 2 women twice and 5 women once.

Of those readmitted for the first time, 3 men and 3 women had been discharged as recovered, and 5 men and 2 women as improved.

One man and 1 woman had each been twice discharged as recovered, and 1 woman had been discharged once as recovered and once as improved.

One man had been discharged four times as recovered, 1 man three times as recovered and once as improved, 1 man once as recovered and three times as improved, and 1 man had been discharged as improved seven times.

One hundred and four of the admissions, 61 men and 40 women, were first attacks, 61 of which, 37 men and 24 women, were admitted first to Bloomingdale. Deducting from the whole number of admissions 20 cases that had been admitted in previous years, and 61 admissions in first attacks, leaves 46 cases that have been either treated at home or at some other institution previous to admission here.

There were 4 men who were discharged and readmitted in the course of the year.

Fifty patients were admitted three months or less after the first symptoms of mental disease were noticed by their friends, 9 between 3 and 6 months, 14 between 6 and 12 months, and 54 more than a year.

DISCHARGES.

The total number of discharges during the year was 132, 75 men and 57 women. The number of recoveries was 34, 15 men and 19 women. They were 26 per cent. of all discharges, including deaths, 20 per cent. of the men who were discharged or died and 33 per cent. of the women who were discharged or died.

Twenty patients, 7 men and 13 women, recovered from the first attack, 7 patients, 5 men and 2 women, from the second, 2 men and 2 women from the third, and 1 man and 1 woman from the fourth attack.

In the 34 cases that recovered the average duration of the disease from invasion to recovery was 8 months and 25 days; of the men 7 months and 21 days, and of the women 9 months and 27 days. The average duration of treatment was 5 months and 24 days; of the men, 5 months and 6 days, and of the women 6 months and 18 days. The longest period of treatment was 14 months and 6 days in the case of 1

man, and 12 months and 15 days in the case of 1 woman; the shortest was 1 month and 15 days of 1 man and 1 month and 19 days of a woman.

The disease was reported to have existed before admission an average of 2 months and 28 days; in the men, 2 months and 15 days, and in the women, 3 months and 9 days.

Sixteen patients, 7 men and 9 women, recovered from mania, and 18, 8 men and 10 women, from melancholia.

Two alcohol habitués, 1 man and 1 woman, and 3 drug habitués, 2 men and 1 woman, were discharged as recovered.

Of the 60 cases, 37 men and 23 women, who were discharged as improved, 6 men and 10 women seemed likely, at the time of their discharge, to recover if continued under treatment.

Of the 10 patients, 5 men and 5 women, who were discharged unimproved, 1 woman seemed likely to recover if continued under treatment.

		Total	28

DEATHS.

Twenty-eight patients, 18 men and 10 women, died during the year, this being 1 more than the number reported last year.

Among these 28 deaths there was only 1 acute case, a woman, and this was not favorable for recovery. She had exophthalmos and, developing quinsy, died two weeks after admission.

Among the remaining 27 cases the mental disease had existed for periods ranging from 8 months to more than 54 years.

One of these cases had been under treatment for 52 years and 4 months, 1 for 33 years and 8 months, 1 for 32 years and 11 months, 1 for 32 years and 3 months, 1 for 17 years and 10 months, and the remainder for shorter periods.

The average time they spent in the institution was 10 years and 10 months.

In the 8 cases of general paresis, the longest period of their hospital treatment was 9 years, 2 months and 19 days, the next longest was for 1 year, 9 months and 27 days; 1 for 1 year, 9 months and 17 days, and the remaining cases for shorter periods.

The average time they were under treatment here was 1 year, 9 months and 7 days. This is two weeks less than the average time this class of patients was under treatment last year.

The longest time for marked manifestation of disease prior to admission was said to have been 6 years; the shortest was 6 months; the average was 2 years and 1 month. The longest period from first manifestation to death was 6 years and 10 months, the shortest was 1 year and 2 months.

The average duration of the disease from the first manifestation to death was said to have been 3 years, 10 months and 7 days.

The total number of deaths was at the rate of 5.94 per cent. of all the cases treated; in the men 7.60 per cent. and in the women 4.25 per cent.

GENERAL REMARKS.

There were three more admissions this year than last.

The average number of people in the Institution was 340, 4 more than the average of the preceding year.

The number of weeks board and treatment furnished for patients was 17,776 $\frac{6}{7}$, an increase since last year of 251 $\frac{6}{7}$ weeks. The average expenditure per patient was \$11.58 per week, which includes the total cost of maintaining the property at White Plains and the

patients upon it, both insane and at the Convalescent Homes, for all salaries and wages, repairs, supplies and maintenance of every kind, except that our high-paying patients, which have increased in numbers, pay us for the exclusive services of their attendants, and we deduct this sum from the total expense, in making up the average cost for the average patient per week. This was a decrease of 63 cents per capita of the cost of the preceding year. This decrease is due to the greater productiveness of the farm and garden, to the larger number of special attendants whose wages are repaid to the hospital, and to the increased number of patients.

Sixty-two women were beneficiaries of the John C. Green Memorial Fund during the year 1904. The amount of income received from that fund and expended for these women in 1904 was \$7,326.00, an increase above the income of that fund for the year 1903 of \$483.49. The total charitable expenditure during the year 1904 in caring for and treating patients (preferably acute, and presumably hopeful cases) was \$46,145.18. Two hundred and forty-five individuals shared in this charitable assistance, some being entirely and others partially supported. The sum of \$38,819.18 was expended for this purpose from the earnings of Bloomingdale during the year 1904, from which fund charitable assistance to patients, both insane and convalescents from the New York Hospital, was given to the extent mentioned above, all profits of Bloomingdale from remunerative patients being expended in maintaining the Institution, and supporting patients not able to pay remunerative prices. Nearly 9 per cent. of the patients treated contributed nothing whatever to their support; 53 per cent. of the patients paid sums varying from nothing to the bare cost of their care. Only 47 per cent. paid a rate which secured a profit for the Institution. The total support and partial assistance rendered to patients unable to pay for their entire cost to the Hospital was equivalent to maintaining about 80 free beds.

There have been no changes in the Staff during the year, excepting that made by the ending of the term of Dr. James Francis Rice on April 30, 1904, as Clinical Assistant, who was succeeded by Dr. Clyde E. McDannald on May 1, 1904, and who continues in service. I am glad to be able again to state that all the officers and employees, with a few exceptions, have discharged their duties faithfully and intelligently, and with evidence of real interest in their work.

TRAINING SCHOOL.

The Institution was visited Saturday, the 21st of May, 1904, by the Vice-President, Governors of the Society and members of the Bloomingdale Committee, who made an inspection of the buildings and

grounds, and attended the exercises in which the graduates of Bloomingdale Training School for Attendants were given their certificates and medals. The graduates, including the 5 who graduated this year, amount to a total of 73 since the school was first started in 1895, of whom there remain in the employ of the Institution 12 men and 27 women.

OUTINGS.

The regular outings, and the summer excursions to the Oakland Bathing Beach at Rye, where the Hospital has hired a small pavilion, were maintained throughout the summer whenever the weather was suitable. The usual games, trolley rides, and individual visits to watering places, etc., and all available industries, varied the occupations of the summer and fall, while the winter was shortened by its appropriate indoor and outdoor recreations and sports.

BLOOMINGDALE TEN YEARS AT WHITE PLAINS, N. Y.

1904 completes 10 years that Bloomingdale has been at White Plains. It left an old-fashioned institution in New York, comfortable but not convenient, which represented the gradual accretions through 75 years of unsystematic growth, where good work was possible, at an unnecessary expense of effort, and where new departures were contra-indicated by a prospect of abandonment of the site. While the departure was postponed for various reasons, time was gained to fully mature, and eventually carry out at White Plains plans for a modern, model, and convenient establishment in a new neighborhood. Ten years of good work done at the new place justifies the change of location and the manner of the new development. At the new place there were no necessary limitations either in space, funds, or policy, to the installation of anything approved, and likely to be advantageous in treating and caring for patients.

Since the work of Bloomingdale was transferred to White Plains, there have been introduced a Training School for Attendants, Patients' School, Therapeutic Baths, ample facilities for Physical Culture, Electric, Dental, Ophthalmic and Gynecological Departments, Clinical and Pathological Laboratory, Cabinetmaking, and other manual training opportunities, salt shore bathing, and a large variety of individual outings.

With this variety in means of treatment there has gone a larger amount of individual freedom and initiative, and a consequently greater

proportion of cure and improvement, and a marked retardation of the mental enfeeblement which, as a rule, terminates chronic insanity.

Over 1,400 persons have enjoyed the benefits of the new Bloomingdale, and fully one-third of these got well enough to live away again, while about three hundred got as well as ever.

During the ten years that Bloomingdale has been at White Plains it has done a large amount of charitable work among the wholly or partially dependent insane of the community. The generous gift of Mrs. John C. Green has given it \$75,814.19 to so dispense where it would best relieve suffering among insane women; and Bloomingdale itself, from its own earnings, has bestowed over \$400,000.00 additional on the worthy and preferably curable insane of both sexes. Its policy has been to aid for a limited time as many hopeful cases as possible, but to retain chronic and hopeless cases only to a limited extent, and through these limitations to scatter its beneficence over as wide a field as possible. Nearly 900 persons have shared its pecuniary assistance at White Plains. While far from experimenting on its patients, no known and approved method to benefit them has been neglected, and the results have been very gratifying, and the figures encouraging, when we consider the proportion of cases, hopeless from the beginning, which such a metropolitan hospital must admit.

Bloomingdale has never entered into any visionary departures or medical advertising, but has always pursued a dignified and liberal course toward its patients and the surrounding community, and it has continued to draw patients of the best class in larger numbers year by year, thus increasing its ability to benefit those needing its aid. At the present time no other hospital is better prepared to do enlightened humane work among the insane, or for those upon the border line, and its recent and prospective additions of attractive detached villas more and more draw patients who are accustomed to have every comfort, and can in these liberally conducted retreats have almost every freedom, while also having every facility a well-equipped hospital affords.

The main buildings for patients, which are connected overground, afford a large variety of accommodations of a very nice and comfortable kind.

The detached villas, which are connected by subways, contain connecting rooms and adjacent baths and all those refined surroundings which are so well exemplified in the modern hotel, and which afford great freedom, comfort and seclusion, with the fullest hospital treatment. Our facilities in those respects are gaining wider appreciation all the time, and the occupants of these villas are largely persons who have had friends at Bloomingdale, or who have themselves enjoyed previously these very modern adjuncts to a hospital for those suffering

a moderate amount of mental fatigue or depression, and these latter often return voluntarily, or send their friends when the occasion arises.

The latest addition to these detached villas at Bloomingdale, the James H. Banker Memorial Villa, with its suites of rooms and adjacent baths, it is expected, will be ready for gentlemen soon after this report is issued, and will be a model building for its purpose.

Respectfully,

SAMUEL B. LYON,
Medical Superintendent.

THE SOCIETY OF THE NEW YORK HOSPITAL,
BLOOMINGDALE, WHITE PLAINS.

GENERAL TABLE OF STATISTICS,

Compiled from the Annual Reports of the Institution.

YEAR.	Admitted.	Whole number during the year.	Whole number discharged and died.	Recovered.	Improved.	Not improved.	Died.	Voluntary, not insane.	Remaining at end of year.	Average number.

GOVERNORS

OF

The Society of the New York Hospital.

The following is a list of the names of Governors from the commencement of the institution to the first of January, 1905, with the date of their respective elections and the length of time they continued in office:

GOVERNORS.	Elect- ed.	Re- signed.	Served the Institution.	
A.				
Charles Ward Apthorp.....	1770	1784	14 years	
William Axtell.....	1770	1784	14 years	
John Alsop.....	1784	1788	4 years	
Gilbert Aspinwall.....	1799	1809	15 years	Died in office, 1819.
Gilbert Aspinwall.....	1811	1812		
Gilbert Aspinwall.....	1815			
John Atkinson.....	1800	1809	9 years	
John Aspinwall.....	1814	1817	3 years	
John Adams.....	1818	1854	36 years	
Stephen Allen.....	1823	1830	24 years	Died in office, 1852.
Stephen Allen.....	1835			
Augustin Averill.....	1848	1857	9 years	
John Jacob Astor.....	1860	1864	4 years	
George W. Abbe.....	1877		2 years	Died in office, 1879.
William W. Astor.....	1879	1882	3 years	
James W. Alexander.....	1904			Continues in office.
B.				
Gerardus William Beekman..	1770	1777	7 years	
George Bowne.....	1770	1784	26 years	
George Bowne.....	1785	1797		
William Bayard.....	1777	1784	9 years	
William Bayard.....	1800	1802		
Robert Bowne.....	1784		34 years	Died in office, 1818.
Aaron Burr.....	1784	1792	8 years	
James Beekman.....	1785	1787	2 years	
Theophylact Bache.....	1785	1797	12 years	
Thomas Buchanan.....	1785	1800	15 years	
Francis Basset.....	1785	1787	2 years	
William Backhouse.....	1787	1792	5 years	
Nicholas Bayard.....	1794	1798	4 years	
John Barrow.....	1795	1807	12 years	
Samuel Bowne.....	1796	1797	1 year	
Walter Bowne.....	1800	1805	5 years	
Dr. Samuel Bard.....	1801	1802	1 year	
Rev. Abraham Beach.....	1801	1806	5 years	
Thomas Buckley.....	1802	1842	40 years	
John Bogert.....	1804	1817	13 years	
John L. Bowne.....	1810	1815	5 years	
Abraham Barker.....	1813	1816	3 years	
Robert H. Bowne.....	1815	1827	12 years	
William Bayard, Jr.....	1818	1823	5 years	

GOVERNORS.	Elect- ed.	Re- signed.	Served the Institution.	
John L. Buckley.....	1842	1855	13 years	
James W. Beekman.....	1850	1854	4 years	
James W. Beekman.....	1858		23 years	Died in office, 1877.
Nathaniel P. Bailey.....	1858		33 years	Died in office, 1891.
James M. Brown.....	1861		29 years	Died in office, 1890.
Theodore B. Bronson.....	1864	1868	4 years	
James H. Banker.....	1869	1876	8 years	
James William Beekman.....	1884		20 years	Continues in office.
Cornelius N. Bliss.....	1885	1899	14 years	
Cornelius N. Bliss.....	1901		4 years	Continues in office.
George S. Bowdoin.....	1887	1903	16 years	
Waldron Post Brown.....	1887		18 years	Continues in office.
Thomas H. Barber.....	1898	1903	5 years	
George H. Baker.....	1899		6 years	Continues in office.
Charles S. Brown.....	1904			Continues in office.
C.				
David Clarkson.....	1770	1777	7 years	
Matthew Clarkson.....	1792	1822	30 years	
John Campbell.....	1794	1797	3 years	
John B. Coles.....	1796	1798	2 years	
Isaac Collins.....	1800	1808	8 years	
John T. Champlin.....	1801	1811	10 years	
John G. Coster.....	1801	1803	2 years	
Samuel Corp.....	1801	1802	1 year	
Richard Cunningham.....	1812	1814	2 years	
Cadwallader D. Colden.....	1812	1827	15 years	
Nathan Comstock.....	1818	1823	5 years	
Duncan P. Campbell.....	1818	1827	9 years	
John Clark, Jr.....	1819	1834	15 years	
Isaac Carow.....	1826		24 years	Died in office, 1850.
Robert C. Cornell.....	1832		13 years	Died in office, 1845.
Stacy B. Collins.....	1846	1864	18 years	
Henry Chauncey.....	1848	1852	4 years	
James N. Cobb.....	1855	1861	6 years	
David Clarkson.....	1856	1865	9 years	
Frederick A. Conkling.....	1857		34 years	Died in office, 1891.
Henry Chauncey, Jr.....	1859	1865	6 years	
Israel Corse.....	1864	1869	5 years	
Joseph H. Choate.....	1877		28 years	Continues in office.
Hermann H. Cammann.....	1882		23 years	Continues in office.
John Claflin.....	1901	1904	3 years	
D.				
Oliver Delancey.....	1770	1784	14 years	
Elias Desbrosses.....	1775		3 years	Died in office, 1778.
James Duane.....	1784	1789	5 years	
William Denning.....	1784	1792	8 years	
William Denning.....	1805	1811	6 years	
Jacob de la Montagnie.....	1797	1802	5 years	
Frederick De Peyster.....	1809	1818	9 years	
Cornelius Dubois.....	1814	1818	4 years	
James F. De Peyster.....	1827	1869	42 years	
James Donaldson.....	1843	1856	13 years	
James Donaldson.....	1858	1862	4 years	
William Dennistoun.....	1865		10 years	Died in office, 1875.
Henry J. Davison.....	1873		17 years	Died in office, 1890.

LIST OF GOVERNORS.

89

GOVERNORS.	Elected.	Re-elected.	Served the Institution.	
William Alexander Duer.....	1890	1901	11 years	
Henry W. de Forest.....	1890		15 years	Continues in office.

TO THE LEGISLATURE
OF THE
STATE OF NEW YORK.

The Governors of the Society of the New York Hospital respectfully present their Annual Report of the state of the Institutions under their charge for the year 1905, as required by law.

ANNUAL REPORT

OF THE

Governors of the Society of the New York Hospital for the Year 1905.

In conformity with the provisions of its Charter, granted by George III of England, June 13, 1771, the Governors of the Society of the New York Hospital present their Annual Report, consisting of the report of the Treasurer and of the several institutions under their control and management, as follows:

The Hospital at Fifteenth and Sixteenth streets, the House of Relief, at 67-69 Hudson street, and the Department for the Treatment of Mental Diseases, known as Bloomingdale, White Plains, Westchester County.

PHILIP SCHUYLER,

President.

HENRY W. CRANE,

Secretary.

NEW YORK, March 6, 1906.

TREASURER'S REPORT.

--	---	------------

Report of the Superintendent of the New York Hospital.

To the Board of Governors:

February 17, 1906.

Gentlemen.—A detailed statement of the work done at the Hospital during the year 1905 is as follows:

At the Hospital.

Patients remaining at beginning of year.....	165
Admitted during the year.....	8,136
Total treated.....	8,301
Total hospital days (including private patients)...	65,784
Total private patients.....	276
Total hospital days in private rooms.....	6,550
Highest daily census.....	218
Lowest " ".....	145
Average " ".....	180
Average days — ward patients.....	18 +
" " private patients.....	23 +
Percentage of free patients in wards.....	70%
Per diem cost, per capita — wards.....	\$2 61
" " " " " — private rooms.....	5 88
Ambulance calls.....	3,394
" " average per day.....	9 +
Emergency cases treated in Minor Operating Room.	4,546
" " " " Reception Ward.....	305
Receipts from private patients for rates.....	\$39,338 74
" " " " " nurses' board...	4,642 00
" " " " " special nurses...	14,106 00
" " " " " professional fees.	5,182 00
" " ward patients.....	20,219 16
" " out-patients.....	6,563 80
" " X-Ray service.....	188 00

The total cost of maintaining the ward patients was \$154,600.74. The receipts from these patients was \$20,219.16, showing an excess of cost over receipts of \$134,381.58.

The details of the work at the House of Relief are given in the special report of the Physician and Surgeon in charge, and need not be

repeated here. A comparison of the business of the year, however, in both institutions, with that of the previous year is of interest.

At the Hospital.

Increase in number of patients.....	969
Decrease in hospital days.....	3,346
Increase of private patients.....	92
Increase of hospital days in private rooms.....	2,375
Increase of ambulance calls.....	484

At House of Relief.

Increase of ward patients.....	121
Decrease in hospital days.....	409
Increase of ambulance calls.....	80
Decrease of out-patients.....	611

The result of treatment at both institutions will be found in the Statistical Tables.

It is interesting to note that the closing of the wards of both Institutions in succession, in connection with the extensive work of painting, while causing a material decrease in the number of Hospital days, did not affect the number of patients admitted, the total, in each case, being greater than that of the preceding year. This work of painting began in May and continued throughout the year. It covered the entire Hospital plant (six buildings), together with the House of Relief, and has left all in good sanitary condition.

The alteration of two floors in the Private Patients' Building from intermediate wards into rooms suitable for private patients, enlarged the capacity of that service, and accounts for its increase both as to patients and Hospital days.

An analysis of the Ambulance service is of interest. As already stated, the number of calls at the Hospital was 3,394, an increase of 484 over the preceding year. These resulted as follows:

Brought to Hospital.....	1,787
Treated, advised and left.....	822
Transferred to home, precinct or other hospital.....	705
Dead on arrival.....	149
Nothing found at place of call.....	56

3,519

1908
The universal extension of the telephone service has placed the matter of summoning an ambulance practically in the hands of the general public, while the custom is growing with the police of placing upon the Ambulance Surgeon the responsibility of determining the gravity of injuries received in street accidents, and, also, of pronouncing people dead in many cases several hours after death has actually occurred. All this raises the question whether some limit should not be fixed, within which the ambulance service should be conducted.

The Out-Patient Department service was very active at both Institutions. The number of individual patients treated at the Hospital was 10,952. These patients made 51,110 visits. There were 35,882 prescriptions issued. The amount paid by these patients for treatment, including X-Ray fees, was \$6,663.80. The cost (estimated) of maintaining the department was \$10,277.11, showing an excess of expenditure over receipts of \$4,113.31.

The total number of individuals benefited by the two institutions during the year was:

At the Hospital.....	22,567
At the House of Relief	36,633
Total	<u>59,200</u>

Of those treated in the wards of the Hospital, 70 per cent. were free, and at the House of Relief, 94 per cent. were free, while of the large number treated in the Out-Patient Departments of the two Institutions (41,855), those who paid, did so at the rate of 10 cents for each prescription or dressing.

The usual provision was made during the year for convalescent patients. Fifty-eight men and 79 women, a total of 137, were sent to the cottages maintained for this purpose at Bloomingdale. They spent a total of 1,885 days. The many and emphatic expressions of appreciation by returned patients showed how thoroughly they enjoyed their stay and how excellent is the work done there. The possibility of extending this branch of our work is worthy of serious consideration.

Also several patients from the Children's Ward were sent to the Country Home for Convalescent Babies at Sea Cliff, L. I., and to the Holiday Farm at Rhinecliffe, N. Y. These, also, proved valuable adjuncts to our Hospital work, and we make grateful acknowledgment of the service rendered.

In the matter of recreation, weekly rides through the park were given to convalescent children and adults, during that portion of the

year which was suitable for such excursions. Also, at Christmas time, the house was elaborately dressed with greens, and the customary entertainment given on Christmas Eve. For all this our thanks are due, and are heartily given to the members of your Board whose generosity made it possible.

The X-Ray Department, under the capable management of Dr. A. H. Busby, Actinographer, has been under very active operation. During the year, 850 radiographs were taken, about 400 fluoroscopic examinations made, and very many treatments given, of which no record was kept.

The details of the work of the Training School for Nurses will appear in the report of the Superintendent of the School. It is only necessary to mention here that during the year the school maintained its high standard of efficiency, and that all concerned in its management devoted themselves with zeal to the development of its beneficent work.

The Hospital has suffered a serious loss through the resignation of Dr. Geo. P. Biggs, Pathologist. Dr. Biggs had filled that position for upwards of 10 years, discharging his duties in the most able and efficient manner. He resigned at the close of the year to devote himself to the private practice of his profession. The position, thus left vacant, was filled by the promotion of Dr. W. J. Elser, Assistant Pathologist. Other changes in the personnel of the department, and in the distribution of the duties, will, it is believed, greatly increase its efficiency, and make it a still more important adjunct to the Hospital.

As your Executive Officer, charged with the responsibility of carrying out your orders in the conduct of the affairs of the Hospital, I cheerfully acknowledge my obligation to all the officers and employees of the Hospital, whose fidelity to duty and singleness of purpose have made success possible.

Respectfully submitted,

GEO. P. LUDLAM,
Superintendent.

Report of the Medical Board of the New York Hospital for the Year Ending December 31, 1905.

To the Board of Governors:

Gentlemen.—As is indicated by the tables of statistics hereto subjoined, the medical and surgical work of the hospital has shown a distinct increase during 1905 over that of the preceding year. A comparison of the two years shows:

	1905.	1904
Patients admitted to wards (including emergency ward)	8,136	7,140
Out-patients treated.....	10,952	8,610
Number of ambulance calls.....	3,394	3,166

The increase in the number of ward patients has occurred, it should be noted, notwithstanding the fact that one ward was out of service for several months during the renovation of the hospital.

During the year Dr. Ball retired from the Attending Staff after eighteen years of service, marked by complete devotion to the interests of his patients and of the hospital. It is a great gratification that your action in placing him upon the Consulting Staff has not only shown your appreciation of his abilities and character but also has given us the opportunity of profiting by them.

In the Pathological Department several changes in the personnel of the staff have been made necessary by the resignation of Dr. George P. Biggs, the Pathologist, who retires after fifteen years of most faithful and efficient service. The work of the department has grown considerably during the year, especially along the lines of bacteriology and clinical chemistry.

The large number of cases of epidemic meningitis treated at the hospital and the House of Relief has made it possible for Dr. Elser, the Assistant Pathologist, to carry out a very extensive and thorough bacteriological study of the disease, which it is believed will aid materially in clearing up some of the many obscure points concerning the origin and development of this dread malady. The very considerable increase in the work of the department reflects the latter's steadily growing importance to the clinical side of the hospital as an aid to accurate diagnosis and to intelligent treatment of the patients.

The urgent need for increased operating room facilities has become more and more apparent. Plans for the enlarging and modernizing of the operating rooms, which have been for some time in course of preparation, are now complete and are ready to be laid before you for your action.

The Medical Board desires to call attention to the present unsatisfactory condition of the ventilation in certain portions of the hospital, notably in the Children's Ward, and to recommend that efforts be made to remedy, in so far as possible, this difficulty.

The experience of the past summer has only served to emphasize the now very generally recognized fact that the treatment in a city hospital, during the hot months, of young children suffering from gastro-intestinal disorders is at best very unsatisfactory. No amount of medical attention and skillful nursing can make a satisfactory substitute for the pure air and out-of-door life of the country. For this reason it is suggested that your Board consider the feasibility of establishing in connection with the Convalescent Home at White Plains, a children's ward where such cases, and others not too acutely sick, could be received and cared for.

For some time past the Medical Board has felt the need of much greater facilities for supplying to the ward patients those two most important therapeutic agents, sunshine and fresh air. Under the present arrangements the narrow balconies on the south side of the hospital are accessible only to convalescents and are, at best, cramped and inconvenient; but such out-door treatment is needed as well by many bed patients, both medical and surgical, and for them there are at present no opportunities whatever. If it were possible to widen the balconies sufficiently to receive narrow, wheeled cots and chairs we would then have most conveniently at hand, in connection with each ward, facilities for enabling both convalescents and bed patients to spend out of doors many hours of each suitable day throughout the entire year.

Respectfully yours,

LEWIS A. STIMSON,

President.

LEWIS A. CONNER,

Secretary.

Report of the Attending Staff of the House of Relief.

NEW YORK, *February*, 1906.

To The Board of Governors:

Gentlemen.—

The steady increase which marked the work of the House of Relief every year after its occupation of the new building was considerably abated in 1905, as shown in the following summary:

	1905.	1904.
Patients in wards	3,387	3,266
Patients treated by Ambulance Surgeon	2,343	2,337
Patients treated in Out-Patient Department	30,903	31,514
Visits made in Out-Patient Department	78,099	78,022
Ambulance calls	5,164	5,084
Ambulance transfers	1,572	1,705
Hospital days	15,053	15,462
Average stay of patients	4.4	4.7

There has been a gain of 4% in the number of patients treated in the wards and of 1½% in the ambulance calls; and a loss of 2½% in hospital days and of 2% in Out-patients.

The receipts from patients were about the same as in 1904:

Private room	\$300 00
Wards	575 00
Out-patients	4,765 00
	<hr/>
	\$5,640 00

350 patients were admitted with surgical diseases; of these 39 died. The principal causes of death were septicæmia (15), cancer (7), peritonitis (5), hernia (3), tetanus (2). 1143 patients were admitted with surgical injuries; of these 66 died. The principal causes of death were multiple injuries (17), fracture of the skull (35), gunshot wounds (3), stabs (2), rupture of liver (2).

There were 217 operations, with 23 deaths. This high rate of mortality, which appears every year, is mainly due to the large proportion of traumatic cases in the service; thus, 6 of the deaths followed fracture of the skull.

On the medical side 1857 patients were admitted, with 160 deaths, nearly 9%. The larger groups are:

	Cases.	Deaths.
Cerebral hemorrhage	31	21
Endocarditis	56	8
Cerebrospinal meningitis	32	17
Malaria	36	1
Nephritis	92	14
Pneumonia	130	44
Phthisis	159	14
Typhoid fever	35	1
Gas poisoning	19	1
Acute alcoholism	137
Delirium tremens	112
Epilepsy	164
Heat	52
Insanity	19
Rheumatism	95

In connection with the recent case in which the Ambulance surgeon failed to recognize severe injuries in the patient to whom he had been called it may be of interest to note that 2343 patients were treated by the Ambulance surgeons without admission to the hospital and without evidence that any of them should have been brought in; and, on the other hand, that 137 were brought in who proved to be only intoxicated. This seems to indicate that, while the Ambulance surgeons may make some mistakes, yet they do their work intelligently and conscientiously and that a large proportion of the doubtful cases, perhaps all, are brought in.

The roof of the building has been freely utilized, even during the winter months, for the exposure of the convalescent patients to the sunlight and open air, and the results have been so satisfactory that we are impelled to recommend an increase of the facilities in order that a larger proportion of the patients may be benefited in this manner. The plan which we have in mind, and which we will submit in person to the Committee, if desired, involves only a small expenditure for portable cots, blankets, and wind-screens, and possibly the construction on the roof of a closet for their storage.

Very respectfully,

LEWIS A. STIMSON,
L. A. CONNER.

REPORT

OF THE

Superintendent of the Training School

To the Board of Governors:

Gentlemen.— I herewith submit the report of the twenty-ninth year of the Training School.

The Staff of the Training School, on duty at the close of the year, is as follows:

Officers and Instructors.

Superintendent of the Training School.....	1
Assistant Superintendent	1
Night Supervisor.....	1
Instructors	3
Head Nurses	5

Pupils.

Seniors	28
Intermediate	25
Juniors	35

The graduating exercises of the class of 1905 were held on February 27, 1905. Of the 26 members who graduated, 17 are now engaged in private nursing, one in district work, two have married, and six are holding institutional positions.

Fifty-seven pupils have entered on probation during the year, 34 of whom have been enrolled as members of the School. Of the 88 pupils in the School, 58 are assigned to duty in the general Hospital and Private Patients' Building, 10 to the House of Relief, and 7 to the Lying-in Hospital.

A term of four months is assigned for duty at the House of Relief, this emergency service in the downtown district being one of the most valuable features of the course. The course in Obstetrics at the Lying-in Hospital is three months and offers an unusually comprehensive experience, inasmuch as the nurses have, in addition to a very active ward service, an equally active out-door service in the east side tenement houses.

The most important changes recently made in the School are as follows: A graduate nurse has been appointed to take charge of the Children's Ward. A preliminary course, not to exceed six months, has been established, which has enabled the pupils to receive much of the necessary theory before undertaking the routine work of the Hospital, and insured their personal instruction in the principles and methods of nursing. Provision has also been made for ten scholarships, and for salaried instruction throughout the course.

A recent appropriation for necessary equipment for individual instruction in the Diet Kitchen will make the course in Dietetics of much more practical value.

The establishment of the preliminary course necessitated a revision and enlarging of the curriculum, and much assistance in instruction has been asked from former members of the House Staff and from the Staff connected with the Out-Patient Department, to whom we desire to extend our grateful thanks. We beg also to express to members of the Attending Staff our appreciation of the lectures which at various intervals they have given to the School.

Of the 504 nurses who have graduated since the establishment of the School in 1877, 272 remain in active service; 182 being engaged in private nursing (157 in New York City and 25 outside); 22 in settlement, district and school work, and army nursing; 58 are holding institutional positions; 10 have taken their degree in medicine. One hundred and fifty-four of the graduates register at the Nurses' Club, 8 West Ninety-second street, 88 of whom are club residents, and this registry reports an increase of 554 calls over the previous year.

I beg to incorporate in this report portions of an interesting report submitted by request by Miss Lillian D. Wald, of the Class of 1891, who shortly after graduation established, in conjunction with Miss M. M. Brewster of the same class, the first Nurses' Settlement in the city of New York.

The Henry Street (Nurses') Settlement was started very simply, nearly thirteen years ago, by the writer, a graduate of the New York Hospital, and one of her classmates. With little additional plan beyond that of offering our services as nurses to the sick in the tenements, to live in the district in which we were to work, to hold our citizenship with the community, and yet to do what was in our power to bring its needs to the public, the Settlement was launched.

The Department of Health bestowed a badge that was created for us and was entrusted to us to use at our discretion. However, the neighbors accepted us immediately, and have ever since given evidence of their appreciation and esteem of the nurses' services.

From the beginning of two nurses, who went from house to house searching for the sick, the service has grown until the stations are now practically all over Manhattan, including a colored nurse in the West Side District and a group in a large Italian tenement, etc., and as soon as sufficient means are acquired the island will be covered. This includes all grades of sick people, from those who can pay nothing to those who pay a small fee.

The extent of the medical work done last year is shown by the following record:

The number of people cared for in the homes was 5,032; the number of visits, 48,235; the number of first-aid treatments, 13,791; the number of patients sent to hospitals, 740.

A systematic method, both as to recording and as to the nurses' work in the tenements, has been developed and the Settlement has been able to be, in a manner, a training for other nurses in cities where district nursing had been or was about to be established.

At our suggestion and through our original experiment for the city, the service of the school nurse has been established, which now forms an important part of the Department of Health, one of our nurses superintending a staff of fifty nurses in Greater New York.

Besides the nursing service, the Settlement through its good friends has been able to maintain a Convalescent Home, and it has also been represented on the Tuberculosis Committee and other similar organizations, in line with although not a part of the Settlement. Multiple activities are comprised within the project of the Settlement too lengthy for enumeration.

From the beginning, the founder of the Settlement has felt a sense of co-operation with the New York Hospital through its trustees, superintendent, official staff and training school, and it is with a sense of this support that I am glad to submit a brief suggestion of the progress of our Settlement to them and as one of their pupils.

(Signed) LILLIAN D. WALD.

Very respectfully submitted,

ANNIE W. GOODRICH.

REPORT OF THE NURSES' WORK OF THE SETTLEMENT FOR 1905.

Number of patients cared for in		Diagnosis of cases:	
homes	5,032	Unclassified medical	1,735
" nursing visits	43,503	" surgical	602
" friendly visits	4,732	Pneumonia	956

Investigations	342		
Carried over into 1906.	182		
Total	5,032		

The year began with 17 graduated nurses and 1 pupil nurse, and ended with 19 graduate nurses and 1 pupil nurse. An obstetrical service was started in November with one of these nurses taking only obstetrical cases.

In 1904, with 15 to 18 nurses, 4,501 patients were cared for and 38,559 visits made.

REPORT

OF THE

Medical Superintendent of the Society of the New
York Hospital, Bloomingdale, White Plains, N. Y.*To the Board of Governors:*

Gentlemen.—In compliance with a By-law of your Honorable Board, the following report of the operation of the Psychopathic Department of the Hospital for the year 1905 is respectfully submitted:

TABLE No. 1.
STATISTICS FOR THE YEAR 1905.

	MEN.	WOMEN.	TOTAL.

	66	45	111	17	7	11	8	4	2	4	2	2	2	13	14	15	10

Five of these cases, all men, were alcoholic habitués. Three were discharged as recovered, and 2 as improved. Two cases, both men, were morphine habitués. One was discharged as improved, and one remains here, practically recovered.

ADMISSIONS.

There were 111 patients, 66 men and 45 women, admitted during the year. There were 4 fewer patients than cases, 4 men having been discharged and readmitted during the year. Twenty-one patients, 14 men and 7 women, had been discharged from the Institution prior to January 1, 1905; 1 man nine times, 1 man six times, 1 man five times, 2 men twice, and 8 men once. Seven women had each been discharged once.

Of those readmitted for the first time, 2 men and 5 women had been discharged as recovered, and 8 men and 2 women as improved.

One man had been discharged twice as recovered, and 1 man had been discharged once as recovered and once as improved.

One man had been discharged three times as recovered, 1 man five times as recovered, 1 man three times as recovered and three times as improved, and 1 man had been discharged as improved nine times.

Eighty-four of the admissions, 50 men and 34 women, were first attacks, 56 of which, 38 men and 18 women, were admitted first to Bloomington. Deducting from the whole number of admissions 24 cases that had been admitted in previous years, and 56 admissions in first attacks, leaves 31 cases that have either been treated at home or at some other institution previous to admission here.

There were 4 men who were discharged and readmitted in the course of the year.

Thirty-one patients were admitted three months or less after the first symptoms of mental diseases were noticed by their friends, 9 between 3 and 6 months, 15 between 6 and 12 months, and 56 more than a year.

DISCHARGES.

The total number of discharges during the year 1905 was 100, 65 men and 35 women. The number of recoveries was 34, 22 men and 12 women. They were 34 per cent. of all discharges, including deaths, 33 per cent. of the men who were discharged or died, and 34 per cent. of the women who were discharged or died.

Twenty patients, 11 men and 9 women, recovered from the first attack, 3 men from the second, 3 men and 2 women from the third, and 1 man and 1 woman from the fourth attack, 1 man from the fifth, and 1 man from the sixth attack.

In the 34 cases that recovered the average duration of the disease from invasion to recovery was 15 months and 19 days; of the men 15 months and 8 days, and of the women 16 months and 7 days. The average duration of treatment was 10 months and 10 days; of the men, 10 months and 1 day, and of the women, 10 months and 27 days. The longest period of treatment was 6 years, 6 months and 4 days in the case of 1 man, and 4 years, 7 months and 21 days in the case of 1 woman; the shortest was 1 month and 5 days in 1 man, and 1 month and 12 days in a woman.

The disease was reported to have existed before admission an average of 5 months and 8 days; in the men, 5 months and 7 days, and in the women, 5 months and 10 days.

Eight patients, 4 men and 4 women, recovered from mania, and 20, 12 men and 8 women, from melancholia.

Six alcohol habitués, all men, were discharged as recovered.

Of the 43 cases, 27 men and 16 women, were discharged as improved. In the cases of 5 men and 5 women it seemed probable, at the time of their discharge, that they would have recovered if continued under treatment.

Of the 8 patients, 7 men and 1 woman, who were discharged unimproved, 1 man would probably have recovered if continued under treatment.

		Total.....	15

DEATHS.

Fifteen patients, 9 men and 6 women, died during the year, this being 13 less than the number reported last year.

Among these deaths there was only 1 acute case, a man, and this was not favorable for recovery. He was in a state of great emaciation and exhaustion when admitted and died two weeks after admission.

Among the remaining 14 cases the mental disease had existed for periods ranging from 8 months to more than 36 years.

One of these cases had been under treatment for 35 years and 5 months, 1 for 28 years and 2 months, 1 for 8 years and 5 months, 1 for 4 years and 5 months, and the remainder for shorter periods.

The average time they spent in the Institution was 6 years, 5 months and 11 days.

In the 6 cases of general paresis, the longest period of their hospital treatment was 8 years, 4 months and 29 days, the next longest was 2 years and 6 days, and the remaining cases were under treatment for shorter periods.

The average time they were under treatment here was 2 years, 2 months and 28 days. This is 5 months and 21 days more than the average time this class of patients was under treatment last year.

The longest time from marked manifestation of disease prior to admission was said to have been 2 years; the shortest was 8 months; the average was 1 year and 5 months. The longest period from first manifestation to death was 10 years and 5 months, the shortest was 10 months.

The average duration of the disease from the first manifestation to death was said to have been 3 years, 7 months and 28 days.

The total number of deaths was at the rate of 3.55 per cent. of all the cases treated; in the men 3.94 per cent., and in the women 2.24 per cent.

GENERAL REMARKS.

There were 16 fewer admissions this year than last.

The average number of people in the Institution was 342, 2 more than the average of the preceding year.

The number of weeks' board and treatment furnished for patients was 17,749 $\frac{1}{7}$. The average expenditure per patient was \$12.11 per week, which includes the total cost of maintaining the property at White Plains, and the patients upon it, both insane and at the Convalescent Homes, and is for all salaries and wages, repairs, supplies and maintenance of every kind, except that our high-paying patients, which have increased in numbers, pay us for the exclusive services of their attendants, and we deduct this sum from the total expense, in making up the average cost for the average patient per week. This was an increase of 53 cents per capita over the cost of the preceding year.

Fifty-one women were beneficiaries of the John C. Green Memorial Fund during the year 1905. The amount of income received from fund and expended for these women in 1905 was \$7,297.78. The total charitable expenditure during the year 1905, in caring for and treating patients (preferably acute and presumably hopeful cases) was \$29,201.17. Two hundred and forty-five individuals shared in this charitable assistance, some being entirely and others partially supported. The charitable assistance of 1905 exceeded that of the previous year \$13,055.99, and the sum of \$51,903.39 was expended for this purpose from the earnings of Bloomington during the year 1905, from

which earnings charitable assistance to patients, both the insane and the convalescent sent here from the New York Hospital, was given to the extent mentioned above. All profits of Bloomington from remunerative patients are expended in maintaining the Institution, and in supporting patients not able to pay remunerative prices. Eight and five-tenths per cent. of the patients treated contributed nothing whatever to their support; 56 per cent. of the patients paid sums varying from nothing to the bare cost of their care. Only 44 per cent. paid a rate which secured a profit for the Institution. The total support and partial assistance rendered to patients unable to pay their entire cost to the Hospital was equivalent to maintaining 94 free beds. Bloomington also contributes to convalescents from general diseases, who had been treated in the acute stage of their disease in the New York Hospital, and who spent their convalescence at the Homes for such patients on the Bloomington property.

The changes in the Medical Staff during the year were the retirement of Dr. Charles E. Atwood, First Assistant Physician, Dr. Clyde E. MacDannald, and Dr. J. E. Gillies, Clinical Assistant Physicians, and the appointment of Dr. August Hoch to succeed Dr. Atwood, and Dr. George S. Amsden as Clinical Assistant Physician.

Dr. Charles E. Atwood was appointed Assistant Physician at Bloomington, March 4, 1892, after he had done valuable work in similar positions at the State Hospitals at Utica and Poughkeepsie. He served here continuously until July 1st of this year. During his service here, he was connected with the Clinic for Nervous and Mental Diseases at the College of Physicians and Surgeons in New York City, and he left Bloomington to pursue the study of these special diseases in Europe, after which he expects to practice his profession in New York City. His service at Bloomington was always capable and cheerfully given, and he left with our sincere regards and best wishes. Dr. August Hoch, who succeeded Dr. Atwood, is well and very favorably known to those whose practice of medicine brings them in close relations to the insane. His ten years' work at the McLean Hospital, and his many valuable papers have given him a very high standing in the medical profession, and he will continue his scientific laboratory work at Bloomington, while also applying himself to executive and practical medical duties, an ideal combination of mental activities.

TRAINING SCHOOL.

The Institution was visited Saturday, the 20th of May, 1905, by the President, Vice-President, Governors of the Society and members of the Bloomington Committee, who made an inspection of the build-

ings and grounds, and attended the exercises in which the graduates of the Bloomingtondale Training School for Attendants were given their certificates and medals. The graduates, including the 3 who graduated this year, amount to a total of 76 since the school was first started in 1895, of whom there remain in the employ of the Institution 6 men and 23 women.

OUTINGS.

The regular outings and the summer excursions to the Oakland Bathing Beach at Rye, where the Hospital has hired a small pavilion, were maintained throughout the summer whenever the weather was suitable. The usual games, trolley rides, and individual visits to watering places, etc., and all available industries, varied the occupations of the summer and fall, while the winter was shortened by its appropriate indoor and outdoor recreations and sports. Tournaments of tennis, games of baseball, pool, billiard, and bowling contests are kept going much of the time, and are participated in by both patients and officers and employees.

Bloomingtondale has a Training School for Attendants, Patients' Classes, Therapeutic Baths, ample facilities for Physical Culture, Electric, Dental, Ophthalmic and Gynecological Departments, Clinical and Pathological Laboratory, Cabinetmaking, and other manual training opportunities, salt shore bathing and a large variety of individual outings, and many indoor occupations and amusements.

With this variety in means of treatment there has gone a large amount of individual freedom and initiative, many paroles of the grounds and neighborhood, visits to New York, trolley rides, etc., and there has been observed a consequently greater proportion of cure and improvement, and a marked retardation of the mental enfeeblement which, as a rule, terminates chronic insanity.

Nearly 1,600 persons have enjoyed the benefits of the new Bloomingtondale, and fully one-third of these got well enough to live away again, while nearly 400 got as well as ever.

During the eleven years Bloomingtondale has been at White Plains it has done a large amount of charitable work among the wholly or partially dependent insane of the community. The generous gift of Mrs. John C. Green has given it over \$80,000 to dispense where it would best relieve suffering among insane women, and from its own earnings it has bestowed over \$450,000 additional on the worthy and preferably curable insane of both sexes. Its policy has been to aid for a limited time as many hopeful cases as possible, but to retain chronic and hopeless cases only to a limited extent, and through these limitations to scatter its beneficence over as wide a field as possible.

An impression prevails to some extent that this branch of the New York Hospital is a money-making establishment. The above statement of charitable work done at Bloomington should dispel this erroneous impression.

The Banker Villa, containing 9 rooms for patients, 2 attendants' rooms and 4 baths, was opened July 1, 1905, for patients of means requiring special care, and has proved most satisfactory.

A careful computation of the expenses of the farm and garden, and of the fair valuation of the products used by Bloomington from them, shows a profit of several hundred dollars. Even at some loss, it would be an advantage to Bloomington as a hospital to have a certain supply of such pure milk from healthy cows, and fresh vegetables, etc., as it now derives from the farm and garden.

I give an extract of a report written by Dr. Hoch to show along what lines the scientific work will be conducted.

"There are practical as well as scientific reasons why every attempt should be made to develop as much as possible the scientific medical work in a hospital. It is also obvious that in the centre of all attempts of this nature must stand a thorough observation of the patients. This implies a minute inquiry into the constitution of the individual to be treated and into the development of the disease, and a most careful analysis of the symptoms both physical and mental. The latter is done at the bedside, as it were, by carefully observing and questioning the patient and by studying the course and outcome of the disease. This bedside or clinical observation constitutes the largest and most important part of the scientific work in mental diseases. But in this study a need is often felt for special tests, be they of a chemical, microscopic, physiological or psychological nature; it is at this point that a clinical laboratory equipment becomes necessary. The laboratory is, therefore, only a tool which in a definite case may or may not be required and it forms a part of the general clinical work. The functions of a pathological anatomical laboratory are so well known that it is scarcely necessary to say much about them. The autopsies and the studies of the tissues will, of course, supplement the clinical studies and are therefore often of great value. But the idea that the chief scientific advance in the knowledge of mental diseases should come from a study of brain after death is erroneous, and this, we are glad to say, is an idea which is much less prevalent than it was ten years ago. The post-mortem studies are only of real value when they are preceded by careful clinical observations.

"Of great importance, in addition to these various observations, is their full recording, since this alone insures a possibility of summing up and attaining of accurate results from which more general conclu-

sions may be drawn and new problems formulated which in turn will furnish the foundation of further work at the bedside and in the laboratory.

"If the study of the patients and the recording of the observations is minute and accurate, the careful treatment follows as a necessary consequence, and all the legal questions, the other important issue in the care of the insane, are well looked after.

"These are, in brief, the ideas which guide us in developing further the medical work of this Hospital. It has been shown in many places that even without such work a hospital may get along very well. But we hope to have made it sufficiently clear that the out-put of energy and expense required to do the best work will be sufficiently compensated and that the practical foundation of this development will show that it is necessary to adjust the entire activity of the hospital so that this work is possible to the fullest extent. No state of satisfaction should be reached before we can feel that all is done that can reasonably be expected."

In the last twenty years there have been discharged from Bloomingdale in the regular routine about 2,650 patients, of whom 730 were recovered, and during the same period there have been discharged through habeas corpus proceedings 14 patients. The previous and subsequent history of the men patients discharged from Bloomingdale in the last twenty years, through habeas corpus proceedings, illustrates the fact that insanity is not always immediately perceived by the casual observer.

Persons who have not made a special study of insanity are apt to think that any patient who can write a connected letter, and who can converse or testify fairly well, is sane. It is a well recognized fact, however, and so treated in the books on insanity, that many insane persons can both write and talk without disclosing their delusions, and indeed are often very successful in concealing them, so that they are only elicited after several interviews.

In closing, I wish to congratulate the Society on one of the most useful and successful years that Bloomingdale has enjoyed.

Respectfully submitted,

SAMUEL B. LYON,

Medical Superintendent.

THE SOCIETY OF THE NEW YORK HOSPITAL,
BLOOMINGDALE, WHITE PLAINS.
